# INSTRUCTIONS – HOW TO EDIT YOUR ELECTRONIC POSTER FILE

## E-POSTER TOUCH

### Introduction

E-Poster 2.0 is a software able to browse and display posters. Posters will be displayed on site on monitor 48" touch vertically oriented, instead of being printed and hanged on the wall. Every monitor is a station, including a smaller touch screen, where every participant will be able to:

1. Search a poster using few keywords, such as topic, authors, title, ID, etc.
2. Watch the poster as a printed one on the monitor
3. Zoom in/out to see the details
4. Type messages or questions to the Authors

In the e-posters area, each participant can look for a specific poster and read in detail the content.

Every author must submit its poster in **PDF format**.

### Editing your PDF file

*Accepted file format for submission: .PDF*
*We recommend traditional vertical format.*
*File size: we suggest max 20 MB*

Please consider that the file will be opened with a viewer that fits the scale of the display screen, independently from the screen dimension you have chosen. The *format is most important than the absolute measure*. Different sizes will be anyway visualized, but they cannot appear to fit with the entire display monitor.

The maximum allowed size is 2.160 pixels x 3.840, with a minimum resolution of 72 dpi. The upload is limited to files having 20 Mb maximum, excluding the video files.

One-page poster is the simpler option, but consider that a multipage file is supported. In this case, the number of pages is unlimited. However, we remind that the higher the number of pages, the heavier the file to download will be.

## OPTIONAL FEATURES

### Audio comment – MP3 File

*Accepted file format for submission: .MP3*
*Duration: 1-2 min*
*File size: Max 10 MB*

In addition to the poster file, during submission, you can also attach your audio comment. We suggest 1 or 2-minute speech max. A headset will be available to hear your audio comment on-site during free-time slots.

The maximum size for audio files to be uploaded is 10 Mb.
